

Custom Chat-Bot Assignment

1. Project Link (Public Hugging Face Space)

The completed and working DataMentor AI application is deployed and publicly accessible at the following link:

Link: <https://huggingface.co/spaces/UmarO977/DataMentor-AI>

2. Brief Chatbot Description

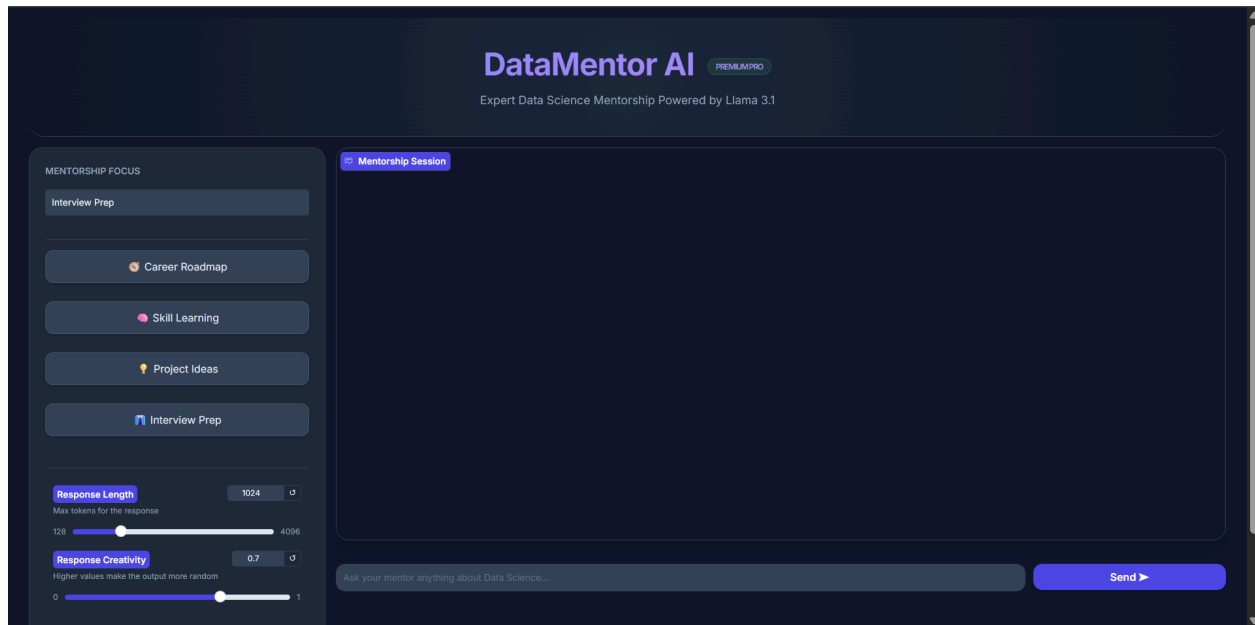

DataMentor AI is a specialized mentorship platform designed to provide structured, industry-aligned guidance for aspiring Data Scientists and AI Engineers. Powered by the **Llama 3.1 8B** model via Groq's ultra-fast inference engine, the application offers a tailored experience that goes beyond generic chatbot responses. The main UI improvement is a dynamic sidebar that allows the user to set their "Mentorship Focus" to **Career Roadmap**, **Skill Learning**, **Project Ideas**, or **Interview Prep**, ensuring the AI's guidance is highly relevant and contextual.

3. Screenshots of Working Chatbot

Here are several screenshots demonstrating the functional and aesthetic features of the DataMentor AI application:

Screenshot 3.1: Main Interface & Custom Header

This image shows the overall modern, dark-themed layout, including the custom HTML header and the professional sidebar design.

Screenshot 3.2: Sidebar and Active Focus Badge

This image highlights the dynamic sidebar, confirming that the "Active Focus" badge is correctly displayed without clipping (a key UI fix).

Screenshot 3.3: Active Focus Display (Skill Learning)

This shows a conversation in progress, verifying that the AI responds appropriately and that the user/bot message styles are correctly applied.

Screenshot 3.4: Active Focus Display (Interview Prep)

This image clearly verifies that the text "Interview Prep" is fully visible and not cut off in the active focus box after applying CSS fixes.

Screenshot 3.5: Chatbot in Use

General view of the chatbot in operation within the deployed Hugging Face Space.
