

Lab: Creating and Publishing a Power BI Dashboard
DV Lab: 07
Time: 1.5 hours
Total Marks: 100

Objective:

By the end of this lab, students will:

- Create a Power BI dashboard with 5-7 visuals.
- Learn how to publish the dashboard to Power BI Service.
- Share and configure the report for automatic data refresh.

Step 1: Preparing the Report in Power BI Desktop

1. **Open Power BI Desktop:**
 - Download and install Power BI Desktop from [Power BI Website](#).
 - Open Power BI Desktop.
 2. **Load the CSV Data:**
 - Click on **Home > Get Data > Text/CSV**.
 - Browse to the location of your CSV file and click **Load**.
-

Step 2: Creating Visuals in Power BI Desktop

Create 5-7 visuals based on the loaded dataset. Follow the steps for each visualization:

Visual 1: Sales by Region (Bar Chart)

1. **Select the Bar Chart** icon from the Visualizations pane.
2. **Drag and drop** the following fields into the chart:
 - **Axis:** **Region**
 - **Values:** **SalesAmount**
3. The bar chart will now show the total sales for each region.

Visual 2: Sales Over Time (Line Chart)

1. **Select the Line Chart** icon from the Visualizations pane.

2. **Drag and drop** the following fields:
 - **Axis:** `SalesDate`
 - **Values:** `SalesAmount`
3. This will show the sales trend over time.

Visual 3: Sales by Product (Pie Chart)

1. **Select the Pie Chart** icon from the Visualizations pane.
2. **Drag and drop** the following fields:
 - **Legend:** `Product`
 - **Values:** `SalesAmount`
3. This pie chart will display the share of sales by each product.

Visual 4: Sales Rep Performance (Table)

1. **Select the Table** icon from the Visualizations pane.
2. **Drag and drop** the following fields into the table:
 - `SalesRep`
 - `SalesAmount`
3. This table will show the sales performance of each representative.

Visual 5: Top Products by Sales (Bar Chart)

1. **Select the Bar Chart** icon from the Visualizations pane.
2. **Drag and drop** the following fields:
 - **Axis:** `Product`
 - **Values:** `SalesAmount`
3. This bar chart will show the total sales for each product.

Visual 6: Sales by Month (Stacked Column Chart)

1. **Select the Stacked Column Chart** icon from the Visualizations pane.
2. **Drag and drop** the following fields:
 - **Axis:** `SalesDate` (set to Month)
 - **Values:** `SalesAmount`
3. This visual will show the sales amount for each month.

Visual 7: Sales Summary (Card)

1. **Select the Card** icon from the Visualizations pane.
2. **Drag and drop** the following field:
 - **Values:** `SalesAmount`
3. This will display the total sales amount in a single card.

Step 3: Formatting the Dashboard

1. **Arrange the Visuals:**
 - Arrange your visuals neatly on the report canvas, ensuring that they are clear and easy to read.
2. **Add Filters and Slicers (Optional):**
 - You can add filters or slicers for the **SalesRep**, **Region**, or **Product** fields so the user can interact with the dashboard.
3. **Save Your Report:**
 - Click **File > Save As** and save your report as **SalesDashboard.pbix**.

Step 4: Publishing the Report to Power BI Service

1. **Publish the Report:**
 - Click **Publish** from the top-right corner of Power BI Desktop.
 - Sign in to Power BI with your Power BI Pro or Premium Per User (PPU) account.
 - Select the workspace where you want to publish the report.
2. **Confirm Publishing:**
 - Once the report is successfully published, you'll see a confirmation message with a link to open the report in Power BI Service.

Step 5: Accessing and Sharing the Report in Power BI Service

1. **Access the Report:**
 - Open [Power BI Service](#).
 - Sign in with your credentials.
 - Navigate to the workspace where you published the report.
 - Click on the report to view it.
2. **Share the Report:**
 - Click on the **file** button.
 - Go to Embed Report
 - Go to Website or Portal
 - Copy Report Link
 - Create a HTML webpage
